About the LI Facilities Services Index

The LI Facilities Services Index is a market cap weighted composite stock index similar to the S&P 500 Index. The index is prepared by first selecting a base period, in this case, Q3 2013, and totaling the market caps of the companies in this period. This period and the total market cap is set to a base index at 100%. Next, the current period's total market cap is calculated, divided by the base period's total market cap and then multiplied by the base index (100%). The result is the index value used for plotting the Relative Stock Index Performance graph above. A full list of the companies included in the LI Facilities Services Index can be found on the back page. Figures shown above are historically updated to reflect the updated LI Facilities Services Index.
